

**Country SA PHN is responsible for commissioning Commonwealth directed funding for primary health services throughout regional South Australia. The service providers listed below are those that have been appointed to date.**

Country SA PHN exists to bridge the gap of health inequity and access in rural South Australia by building a collaborative and responsive health care system. We do this by increasing the efficiency and effectiveness of medical service delivery while improving the coordination of care to ensure patients receive the right care in the right place at the right time.
